

# Jeil Medical Arix Primary Closure System Coding Reference Guide

## Jeil Medical Arix

Jeil Medical Arix is indicated for stabilization and fixation of fractures of the anterior chest wall including sternal fixation following sternotomy or sternal reconstructive surgical procedures to aid in the alignment and stabilization of bone.

## Jeil Medical Arix Sternal Closure System

Jeil Medical Arix Sternal Closure System is intended for use in the stabilization and fixation of fractures of the sternum including sternal fixation following sternotomy and sternal reconstructive surgical procedures, to promote fusion. The system is intended for use in patients with normal and/or poor bone quality.

Physician			
CPT* Code	Description		
<i>This separate procedure by definition is usually a component of a more complex service and is not identified separately. When performed alone or with other unrelated procedures/services, it may be reported.</i>			
21750	Closure of median sternotomy separation with or without debridement (separate procedure)		
Hospital Inpatient: ICD-10-PCS Code and Description			
Reposition
